

Postdoc positions in the Israeli Center for Economics and Computation

We have several postdoc positions for excellent graduates in the general area of economics and computation (EC) / algorithmic game theory (AGT) in several universities in Israel: The Hebrew University of Jerusalem, Tel-Aviv University, and the Technion (in Haifa). These positions are supported by a variety of funding sources, provide a comfortable living, and allow reasonable travel to conferences. The participating hosts include:

Hebrew University (Center for Rationality)	Tel-Aviv University (CS)	Technion (IEM)
Liad Blumrosen (Business) Sergiu Hart (Math/Econ) Katrina Ligett (CS) Noam Nisan (CS) Aviv Zohar (CS)	Yossi Azar Michal Feldman Amos Fiat Yishay Mansour	Yakov Babichenko Yuval Emek Ron Lavi Reshef Meir Rann Smorodinsky Moshe Tennenholtz

Beyond working with the formal post-doctoral host, these positions enable and encourage collaboration with other faculty members in the group, and with their postdocs and graduate students. We also encourage joint postdoctoral positions (hosted by two hosts), possibly from different departments or universities.

Candidates must have a Ph.D. in Computer Science, Economics, Mathematics, Operations Research, or a related field, a publication record in an area related to economics and computation, and strong recommendations.

The “default” dates for the position are according to the usual academic year, 10/2018-9/2019, with a possibility of an extension for another year. However, we are very flexible in terms of starting dates and durations (e.g., beginning of 2018 might also work).

To apply, please send an email to your preferred post-doctoral host(s), including your CV, a research statement, and names of three references.
