

TABLE OF CONTENTS

VOLUME CI

SHAHAR NEVO, XUECHENG PANG AND LAWRENCE ZALCMAN—Quasi-normality and meromorphic functions with multiple zeros	1
ALEXANDER IOSEVICH, ERIC T. SAWYER AND ANDREAS SEEGER—Mean lattice point discrepancy bounds, II: Convex domains in the plane	25
V. P. HAVIN, A. H. NERSESSIAN AND J. ORTEGA-CERDÀ—Uniform estimates in the Poincaré-Aronszajn theorem on the separation of singularities of analytic functions	65
LUCA BARACCO, DMITRI ZAITSEV AND GIUSEPPE ZAMPIERI — Rays condition and extension of CR functions from manifolds of higher type	95
T. SANDERS — The Littlewood-Gowers problem	123
STEPHEN J. GARDINER AND IVAN NETUKA — Potential theory of the farthest point distance function	163
FERNANDO CHAMIZO AND ADRIÁN UBIS — Some Fourier series with gaps	179
MÁRTON ELEKES AND MIKLÓS LACZKOVICH — A cardinal number connected to the solvability of systems of difference equations in a given function class	199
DANIELA KRAUS, OLIVER ROTH AND STEPHAN RUSCHEWEYH — A boundary version of Ahlfors' lemma, locally complete conformal metrics and conformally invariant reflection principles for analytic maps	219
AKOS MAGYAR, ELIAS M. STEIN AND STEPHEN WAINGER — Maximal operators associated to discrete subgroups of nilpotent Lie groups	257
ALEXANDRE EREMENKO AND PETER YUDITSKII — Uniform approximation of $\operatorname{sgn} x$ by polynomials and entire functions	313
J. BOURGAIN — Exponential sum estimates in finite commutative rings and applications	325
S. T. BELINSCHI AND H. BERCOVICI — A new approach to subordination results in free probability	357
HOAI-MINH NGUYEN — Optimal constant in a new estimate for the degree	367
