

## TABLE OF CONTENTS

### VOLUME CV

ROLANDO MAGNANINI AND SHIGERU SAKAGUCHI — Polygonal heat conductors with a stationary hot spot	1
DAVID SHOIKHET — Another look at the Burns–Krantz Theorem	19
V. V. VOLCHKOV AND VIT. V. VOLCHKOV — Convolution equations and the local Pompeiu property on symmetric spaces and on phase space associated to the Heisenberg group	43
FERNANDO PÉREZ-GONZÁLEZ AND JOUNI RÄTTYÄ — Univalent functions in Hardy, Bergman, Bloch and related spaces	125
PETER EBENFELT AND HERMANN RENDER — The Goursat problem for a generalized Helmholtz operator in the plane	149
PIERRE GERMAIN — Strong solutions and weak-strong uniqueness for the nonhomogeneous Navier-Stokes system	169
ENRICO BERNARDI AND TATSUO NISHITANI — On the Cauchy problem for non-effectively hyperbolic operators, the Gevrey 5 well-posedness	197
ANDREA CIANCHI, RON KERMAN AND LUBOŠ PICK — Boundary trace inequalities and rearrangements	241
IAN GRAHAM, HIDETAKA HAMADA, GABRIELA KOHR AND MIRELA KOHR — Asymptotically spirallike mappings in several complex variables	267
DRAGOMIR ŠARIĆ — On quasiconformal deformations of the universal hyperbolic solenoid	303
BARRY SIMON — Two extensions of Lubinsky’s universality theorem	345
JEAN-PIERRE KAHANE ET YITZHAK KATZNELSON — Entiers aléatoires et analyse harmonique	363
JEAN-PIERRE KAHANE ET YITZHAK KATZNELSON — Distribution uniforme de certaines suites d’entiers aléatoires dans le groupe de Bohr	379
PETER D. LAX — A curious functional equation	383
ALEXANDER TUMANOV — Analytic continuation from a family of lines	391
