

TABLE OF CONTENTS

VOLUME CVI

JEAN BOURGAIN — The sum-product theorem in \mathbb{Z}_q with q arbitrary	1
VALENTINO MAGNANI — Non-horizontal submanifolds and coarea formula	95
IAN TICE — Lorentz space estimates and Jacobian convergence for the Ginzburg-Landau energy with applied magnetic field	129
OUTI ELINA MAASALO — Global integrability of p -superharmonic functions on metric spaces	191
ROBERTO PAOLETTI — Szegő kernels, Toeplitz operators, and equivariant fixed point formulae	209
VLADIMIR BOLOTNIKOV AND ALEXANDER KHEIFETS — Carathéodory–Julia type theorems for operator valued Schur functions	237
ANNE BOUTET DE MONVEL, IRYNA EGOROVA AND GERALD TESCHL — Inverse Scattering Theory for one-dimensional Schrödinger operators with steplike finite-gap Potentials	271
TUOMAS HYTÖNEN, JAN VAN NEERVEN AND PIERRE PORTAL — Conical square function estimates in UMD Banach spaces and applications to H^∞ -functional calculi	317
T. BLOOM AND N. LEVENBERG — Asymptotics for Christoffel functions of planar measures	353
D. S. LUBINSKY — Universality limits in the bulk for arbitrary measures on compact sets	373
