

TABLE OF CONTENTS

VOLUME LXIV

SATOSHI TAKAHASHI — A variational formula for dimension spectra of linear cellular automata	1
ANTONIO CORBO ESPOSITO AND RICCARDO DE ARCANGELIS — Homogenization of Dirichlet problems with nonnegative bounded constraints on the gradient	53
JOSÉ L. FERNÁNDEZ AND JOSÉ GONZÁLEZ LLORENTE — Geodesic excursions to infinity in Riemann surfaces	97
PH. THIEULLEN, C. TRESSER AND L. S. YOUNG — Positive Lyapunov exponent for generic one-parameter families of unimodal maps	121
JULIAN GEVIRTZ — The theory of sharp first-order univalence criteria	173
E. BELLER AND C. HOROWITZ — Zero sets and random zero sets in certain function spaces	203
ROBERT S. STRICHARTZ — A fractal Radon inversion problem	219
ELI GLASNER — Topological ergodic decompositions and applications to products of powers of a minimal transformation	241
BERNARD LASCAR, RICHARD LASCAR AND NICOLAS LERNER — Propagation of singularities for non-real pseudo-differential operators	263
CHRISTOPHER J. BISHOP — How geodesics approach the boundary in a simply connected domain	291
WALTER BERGWELER AND HEINRICH BOCK — On the growth of meromorphic functions of infinite order	327
NAKHLÉ ASMAR, EARL BERKSON AND T. A. GILLESPIE — On Jodeit's multiplier extension theorems	337
Correction to "Singularities of the Weierstrass type functions" by M. Hata, Journal d'Analyse Mathématique 51 (1988), 62–90	347
