

## TABLE OF CONTENTS

### VOLUME LXXI

GIOVANNA CERAMI AND DONATO PASSASEO — High energy positive solutions for mixed and Neumann elliptic problems with critical nonlinearity	1
ALBERTO PARMEGGIANI — An application of the almost-positivity of a class of fourth-order pseudodifferential operators	41
FRANK SOMMEN AND BERNARD JANCEWICZ — Explicit solutions of the inhomogeneous Dirac equation	59
ARA BASMAJIAN — Large parameter spaces of quasiconformally distinct hyperbolic structures	75
YUEFEI WANG — Sharp forms of Nevanlinna’s error terms	87
NICHOLAS S. ORMES — Strong orbit realization for minimal homeomorphisms	103
DASHAN FAN AND YIBIAO PAN — On the Fourier transform of measures carried by submanifolds of finite type	135
DONALD SARASON AND DANIEL SUAREZ — Inverse problem for zeros of certain Koebe-related functions	149
W. HANSEN AND IVAN NETUKA — Successive averages and harmonic functions	159
DANIEL LEVIN AND MICHAEL SOLOMYAK — The Rozenblum–Lieb–Cwikel inequality for Markov generators	173
JEAN ESTERLE — Countable inductive limits of Frechet algebras	195
J. KWIATKOWSKI AND Y. LACROIX — Multiplicity, rank pairs	205
ROLANDO MAGNANINI AND SHIGERU SAKAGUCHI — The spatial critical points not moving along the heat flow	237
GIANNI DAL MASO, ADRIANA GARRONI AND IGOR V. SKRYPNIK — A capacity method for the asymptotic analysis of Dirichlet problems for monotone operators	263
DER-CHEN CHANG AND JINGZHI TIE — Estimates for spectral projection operators of the sub-Laplacian on the Heisenberg group	315
Addendum to “A necessary and sufficient condition for a lower bound for fourth-order pseudodifferential operators” by Cesare Parenti and Alberto Parmeggiani, <i>Journal d’Analyse Mathématique</i> <b>69</b> (1996),
