

TABLE OF CONTENTS

VOLUME LXXVII

| | |
|--|-----|
| LOTFI LASSOUED AND PETRU MIRONESCU — Ginzburg–Landau type energy with discontinuous constraint | 1 |
| JEAN-YVES CHEMIN — Théorèmes d’unicité pour le système de Navier-Stokes tridimensionnel | 27 |
| CARLOS A. BERENSTEIN, DER-CHEN CHANG AND BAO QIN LI — The uniqueness problem and meromorphic solutions of partial differential equations | 51 |
| M. BONK AND A. EREMENKO — Schlicht regions for entire and meromorphic functions | 69 |
| BORIS RUBIN — Inversion and characterization of the hemispherical transform | 105 |
| J. E. COLLIANDER AND R. L. JERRARD — Ginzburg–Landau vortices: weak stability and Schrödinger equation dynamics | 129 |
| PETER YUDITSKII — A complex extremal problem of Chebyshev type | 207 |
| MICHAEL LIN AND ARKADY TEMPELMAN — Averaging sequences and modulated ergodic theorems for weakly almost periodic group representations | 237 |
| P. BALODIS AND A. CÓRDOBA — The convergence of multidimensional Fourier–Bessel series | 269 |
| TAMOTU KINOSHITA — On third order hyperbolic equations | 287 |
| J. BOURGAIN — On growth of Sobolev norms in linear Schrödinger equations with smooth time dependent potential | 315 |
