

## TABLE OF CONTENTS

### VOLUME LXXXIX

MIKHAIL LIFSHITS ET MICHEL WEBER — Régularisation spectrale et propriétés métriques des moyennes mobiles	1
MITSURU SUGIMOTO — A smoothing property of Schrödinger equations along the sphere	15
PAUL LOYA — Complex powers of differential operators on manifolds with conical singularities	31
KAREN YAGDJIAN — Geometric optics for the Kirchhoff-type equations	57
FRANZ PEHERSTORFER AND PETER YUDITSKII — Asymptotic behavior of polynomials orthonormal on a homogeneous set	113
STEPHAN RUSCHEWEYH AND TED J. SUFFRIDGE — A continuous extension of the de la Vallée Poussin means	155
DETLEF MÜLLER AND FULVIO RICCI — Solvability of second- order left-invariant differential operators on the Heisenberg group satisfying a cone condition	169
ALEXANDER BORICHEV — On the minimum of harmonic functions	199
RICHARD BEALS AND PETER GREINER — Approximate identities from Laguerre functions and singular integrals on the Heisenberg group	213
SÉBASTIEN FERENCZI, CHARLES HOLTON AND LUCA Q. ZAMBONI — Structure of three-interval exchange transformations II: A combinatorial description of the trajectories	239
YIHONG DU AND ZONGMING GUO — Boundary blow-up solutions and their applications in quasilinear elliptic equations	277
REINER KÜHNAU — Variation of diametrically symmetric or elliptically schlicht conformal mappings	303
PETER DUREN AND REINER KÜHNAU — Elliptic capacity and its distortion under conformal mapping	317
MATS ANDERSSON AND BO BERNDTSSON — Almost holomorphic extensions of ultradifferentiable functions	337
PHILIPPE LAURENÇOT AND PHILIPPE SOUPLET — On the growth of mass for a viscous Hamilton–Jacobi equation	367
ALEXEI POLTORATSKI — Images of non-tangential sectors under Cauchy transforms	385
