

## TABLE OF CONTENTS

### VOLUME XCVII

DANIEL LENZ AND PETER STOLLMANN — An ergodic theorem for Delone dynamical systems and existence of the integrated density of states	1
SUNDARAM THANGAVELU AND YUAN XU — Convolution operator and maximal function for the Dunkl transform	25
JOHN E. MCCARTHY AND MIHAI PUTINAR — Positivity aspects of the Fantappiè transform	57
BENJAMIN CAHEN — Contractions of $SU(1, n)$ and $SU(n + 1)$ via Berezin quantization	83
DAVID DAMANIK AND SERGUEI TCHEREMCHANTSEV — Scaling estimates for solutions and dynamical lower bounds on wavepacket spreading	103
YASUHIRO GOTOH — An extension of the Uchiyama theorem and its application to composition operators which preserve BMO	133
GERSHON WOLANSKY — Rotation numbers for measure-valued circle maps	169
XAVIER MARY — Theory of subdualities	203
FERRUCCIO COLOMBINI AND KUNIHICO KAJITANI — The Cauchy problem for nonstrictly second order hyperbolic equations with nonregular coefficients	243
ERIC T. SAWYER AND RICHARD L. WHEEDEN — <i>A priori</i> estimates for quasilinear equations related to the Monge–Ampère equation in two dimensions	257
J. BOURGAIN — Exponential sum estimates over subgroups of $\mathbb{Z}_q^*$ , $q$ arbitrary	317
J. K. LANGLEY — Non-real zeros of higher derivatives of real entire functions of infinite order	357
