ISRAEL JOURNAL OF MATHEMATICS

TABLE OF CONTENTS, VOLUME 259, 2024

Alexandrino, M. M., B. Alves and M. A. Javaloyes *On equifocal Finsler submanifolds and analytic maps* 203

Alves, B. See M. M. Alexandrino

Alves, C. O. and C. Ji *Multi-peak positive solutions for a logarithmic Schrödinger equation via variational methods* 835

Anderson, R. M., H. Duanmu and A. Smith *Mixing times and hitting times for general Markov processes* 759

Andruskiewitsch, N. *On pointed Hopf algebras over nilpotent groups* 169

Berele, A. and S. Catoiu *Specialized symmetric functions and trace identities* 503

Betsumiya, K., C. H. Lam and H. Shimakura *Automorphism groups of cyclic orbifold vertex operator algebras associated with the Leech lattice and some non-prime isometries* 621

Biagi, S. and A. Bonfiglioli *Global heat kernels for parabolic homogeneous Hörmander operators* 89

Bonfiglioli, A. See S. Biagi

Borovoi, M. and D. A. Timashev *Galois cohomology and component group of a real reductive group* 937

Boulanger, A. and S. Ghazouani $\mathrm{SL}_2(\mathbb{R})$*-dynamics on the moduli space of one-holed dilation tori* 1

Braga, B. M. *Towards a theory of coarse geometry of operator spaces* 527

Burguet, D. and R. Shi *Mean dimension of continuous cellular automata* 311

Catoiu, S. See A. Berele

Chen, F., S. Tan and N. Yu *Extended affine Lie algebras, vertex algebras and equivariant ϕ-coordinated quasi-modules* 347

De Medts, T. and J. Meulewaeter *Inner ideals and structurable algebras: Moufang sets, triangles and hexagons* 33

Duanmu, H. See R. M. Anderson

Garbe, F., D. Kráľ and A. Lamaison *Hypergraphs with minimum positive uniform Turán density* 701

Garkusha, G. *Group schemes and motivic spectra* 727

Ghazouani, S. See A. Boulanger

Gut, F. and A. Joó *Large vertex-flames in uncountable digraphs* 401

Iglesias-Zemmour, P. *Čech–De Rham bicomplex in diffeology* 239
Javaloyes, M. A. See M. M. Alexandrino
Ji, C. See C. O. Alves
Joó, A. See F. Gut
Kastis, E. and S. C. Power *The parabolic algebra revisited* 559
Kráľ, D. See F. Garbe
Kuca, B. *Multidimensional polynomial Szemerédi theorem in finite fields for polynomials of distinct degrees* 589
Kundu, R. and A. Singh *Generating functions for the powers in* $\mathrm{GL}(n, q)$ 887
Lahiri, A. and C. Sorensen *Rigid vectors in p-adic principal series representations* 427
Lamaison, A. See F. Garbe
Lam, C. H. See K. Betsumiya
Leite, E. and M. Montenegro *Principal eigenvalues and eigenfunctions to Lane–Emden systems on general bounded domains* 277
Meulewaeter, J. See T. De Medts
Montenegro, M. See E. Leite
Power, S. C. See E. Kastis
Prokhorova, M. *Spectral sections* 651
Reid, C. D. *Totally disconnected locally compact groups with just infinite locally normal subgroups* 461
Shi, R. See D. Burguet
Shimakura, H. See K. Betsumiya
Singh, A. See R. Kundu
Smith, A. See R. M. Anderson
Sorensen, C. See A. Lahiri
Tan, S. See F. Chen
Timashev, D. A. See M. Borovoi
Usuba, T. *The list-chromatic number and the coloring number of uncountable graphs* 129
Yu, N. See F. Chen
